Import data from a MySQL database table into a Pandas DataFrame using the pymysql package.

mysql-pandas-import.py

Raw

```
1 import pandas as pd
2 import pymysql
3 from sqlalchemy import create_engine
4
5 engine = create_engine('mysql+pymysql://<user>:<password>@<host>[:<port>]/<dbname>')
6
7 df = pd.read_sql_query('SELECT * FROM table', engine)
8 df.head()
```

Had a few difficulties getting this to run - removed the square brackets around [:] did the job, hope that helps anyone struggling.
Really helpful though, thanks!
